Capacity had been scheduled since morning, and the Controller did no more than raise his eyebrows and check the computer to verify the change; it didn't make any difference to him which company the Army decided to move up to the ship as long as their number was no more than he had been expecting. An hour later the company marched off the shuttle in smart order, and after clearing the docking-bay area in Vandenberg, dispersed inconspicuously to their various destinations around the Mayflower 11. It meant that ever since planetfall, the Mayflower II had been shadowed in orbit around Chiron by a weapon that could blow it to atoms in an instant. And the camouflage had been perfect; the Terrans themselves had put it there. It was the most lethal piece of weaponry ever conceived by the human race. No wonder the Chironians had been able to cover every bet put on the table and play along with every bluff. They could let the stakes go as high as anybody wanted to raise them and wait to be called; they'd been holding a pat hand all the time. Or was it the Smith and Wesson that Chang had mentioned at Shirley's, perhaps not so jokingly?.Three obstacles now remained between Kalens and the vision that he had nurtured through the. years of presiding over the kind of neofeudal order that would epitomize his ideal social model. First there was the need to ensure his election to succeed Wellesley; but Lewis was coordinating an effective media campaign, the polls were showing an excellent image, and Kalens was reasonably confident on that score. Second was the question of the Chironians. Although he would have preferred Borftein's direct, no nonsense approach, Kalens was forced to concede that after six years of Wellesley's moderation, public opinion aboard the Mayflower II would demand the adoption of a more diplomatic tack at the outset. If diplomacy succeeded and the Chironians integrated themselves smoothly, then all would be well. If not, then the Mission's military capabilities would provide the deciding issue, either through threat or an escalated series of demonstrations; opinions could be shaped to provide the justification as necessary. Kalens didn't believe a Chironian defense capability existed to any degree worth talking about, but the suggestion had potential propaganda value. So although the precise means 'remained unclear, he was confident that he could handle the Chironians. Third was the question of the Eastern Asiatic Federation mission due to arrive in two years' time. , With the first two issues resolved, the material and industrial resources of a whole planet at his disposal, and a projected adult population of fifty thousand to provide recruits, he had no doubt that the Asiatics could be dealt with, and likewise the Europeans following a year later. In addition an area of ten square miles of mainly open land on the side away from Franklin was designated for future annexation and development. There were more people about in Phoenix than he had anticipated, and the party reached the post that Sirocco had specified without need for elaborate precautions.. that movies are life, Bobby said, "You're not the hero. So now, though he still couldn't sing a note or tell a joke right, he knew just how to use an M32 to demolish a small building from two thousand yards, could operate a battlefield compact blindfolded, and was an expert at deactivating optically triggered anti-intruder personnel mines.. "You don't have to live with it, Mother," Adam told her. Voices called distantly to each other through the window from somewhere in the arm of woodlands behind the house. Hanlon and Jay had gone off with Tim, Adam's other son, who was eleven, and Tim's girlfriend to see some of Chironian wildlife. Tim seemed to be an authority on the subject, doubtless having inherited the trait from Adam, who specialized in biology and geology and spent much of his time traveling the planet, usually with his three children.. "But that doesn't mean we have to take chances," Anita pointed out.. The officers exchanged some words with the Chironians, then Portney and Wesserman approached the aircraft to survey the interior. Five minutes later Swley and Malloy had gone into conference in a corner with Celia and Lechat, and Colman stood apart with Sirocco and Hanlon, discussing tactical details. "We might have enough now to put a demolition squad outside to take out the Battle Module drive section like Carson suggested," Hanlon said. "Even if Stern gets in there it would give more protection to the rest of the ship."
