Telling herself, Get a grip.. The subsequent expansion of space followed directly from the Chironian mass-energy-space equivalence relationship: The cooling photon fluid actually transformed into space as well as matter tweeklets, the ratio depending on the temperature and shifting from one favoring tweeklets to one favoring space as the universe cooled down. Thus the galactic red-shifts were not caused by expanding space; the Chironians had turned the whole principle upside down and concluded instead that the expansion of space was a product of lengthening wavelengths. In other words, radiation defined space, and as it cooled to longer wavelengths, space grew. Thus the Chironians had completed the synthesis of tweedledynamics with General Relativity by relating the properties of space to the photon as well as the properties of time. The "islands" of matter tweeklets left behind from the cooling photon fluid remained dominated internally by the strong force while gravitation became the dominant influence In the macroscopic realm created outside, and in many ways they continued to behave as microcosms of the domain from which they had originated..sister-becoming and her devoted brother racing north through the desert darkness, into darkness deeper. It's commendable, very commendable . . . the kind of thing we could do with more of in the Service.".she'd grown all but oblivious of the sun. "How old are you, kid?". "Thanks. I guess.".Celia had become very thoughtful in the last few seconds. She waited for the talking to subside for a moment, and then said, "If we have to go up to the ship anyway, it might be possible to make this far more effective than what we've 1been talking about so far." She paused, but nobody interrupted. "I know where the people who have been arrested.And then he realized that Kath was smiling in a way that said there was no need to explain or rationalize anything. Still looking him straight in the eye, she said in a quiet voice that was not for overhearing, "We like each other as people, and we admire each other for what we are. There isn't anything to feel hung up about on Chiron. People who feel like that usually make love, if that's what they want to do." She paused for a second. It wasn't so much the spectacle of Mrs. Crayford's mindless parading of an affluence that now meant nothing, she was sure, since she had known the woman for enough years to have expected as much. Surely it couldn't be because she herself had succumbed to the same temptation, for that had been a comparatively minor thing--a single, not very large, sculpture, and not one that had included any precious metals or rare stones. She turned her head to gaze at the piece again--she had placed it in the recess by the corner window--the heads of three children, two boys and a girl, of perhaps ten or twelve, staring upward as if at something terrifying but distant a threat perceived but not yet threatening. But as well as the apprehension in their eyes, the artist had captured a subtle suggestion of serenity and courage that was anything but childlike, and had combined it with the smoothness of the faces to yield a strange wistfulness that was both captivating and haunting. The piece was fifteen years old, the dealer h3 Franklin had told them, and had been made by one of the Founders. Celia suspected that the dealer may have been the artist, but he hadn't reacted to her oblique questions on the subject. Were the expressions on those faces affecting her for some reason? Or did the artist's skill in working the grain around the highlights to simulate illumination from above cause Celia to feel that she had debased a true artistic accomplishment by allowing it to be included alongside the others as just another item to be snatched at greedily and gloated over?.ticking away. Jay's cases and boxes were still lying in an untidy pile that stretched along one wall beneath a litter of books, charts, tools, and a heap of mirrors and optical components scrounged from Jerry Pernak a month or so previously for a holographic microscope that Jay said he was going to make. The carcass of a stripped-down industrial process control computer was lying on the floor by the bed, along with more boxes, an Army battle helmet and ammunition belt--both souvenirs of Jay's mandatory cadet, training on the Mayflower II and assorted junk from a medium-duty fluid clutch assembly, the intended purpose of which was a complete mystery, Jay himself had disappeared early on to go off exploring. Bernard shrugged to himself. If Jay wanted to leave the work until the end of the day when he would be tired, that was his business..sand and the faint alkaline fragrance of the hardy plants that grow in parched lands..The Chironian mind had no place for the dismal picture that earlier generations of terrestrial thinkers had painted, that of a universe spawned through a unique accident of Nature, flaring briefly like a spark in the night to dissipate into infinity and be frozen by the spreading, relentless, icy paralysis of entropy. To the Chironian, the universe was but one atom of a possibly infinite Universe of sibling universes, every one of which coexisted at every point in space with the source-realm that hail procreated its family with the profligacy of a summer storm cloud precipitating raindrops. Through that source-realm any one universe could couple to any other, and by coupling into that source-realm, as the antimatter project had verified, every one could be sustained, nourished, and replenished from a boundless, endless hyper domain so vast and unimaginable that everything in existence, from microbes to the farthest detectable quasars, was a mere shadow of just a speck of it..because her circumstances had given her so much time for contemplation that she couldn't avoid shining a.He went to the bed, leaned down to his sister, and kissed her damp cheek. "Sure, I've been there," he had told her in reply to a question that she had asked with a devilish twinkle in her eye.
